

Education

University at Vivekananda Institute of Technology

in Bachelor of Engineering in Computer Science –June 2024

-Pre-University at Cathedral Composite Pu College Course (PCMC) in 2020

-Tenth (ICSE) at St Germain High School in 2018

- Bangalore

Technical Skills

Languages: Skilled in HTML/CSS (semantic structure, Flexbox, Grid), JavaScript, Next.js (SSR, API routes, dynamic routing), and MongoDB.

React.js: Hands-on experience with components, props, state, hooks, routing, and API integration to build dynamic, responsive UIs.

Developer Tools: Proficient with VS Code (extensions, debugging, Git), Eclipse (Java dev), and Android Studio (basic app testing & building).

Deployment Platforms: Experienced in deploying applications using Vercel (Next.js builds, env vars, serverless functions) and Render

(backend/API hosting, pipelines).

Projects

Old Age Home Management System | Frontend-HTML, CSS, JS, SQL Database, Backend-Python

- Developed a website to manage, operate and support the functions of old age homes
- Improved the performance of old age homes through which they can easily find out their daily activities and help in monitoring them by tuning database applications an instance of Chrome in order to interact with the correct elements of the web page.
- Reduced the number of major incidents through problem management.
- Through this website the management of old age home can keep themselves up to date.

Computer Graphics – Mangalore Aeroplane Crash | frontend: Reactjs, OpenGL funtions

- A graphics Application using OpenGL funtions to represent the real incident of the crash that took place in Mangalore where a flight had taken off from Dubai on May 22 2010 team in Air India Express Flight 812. 158 were killed in the crash and eight survived.
- Designed for representation by creating an animated environment with cloud and two buildings at a maximum distance to represent the crash of the plane through OpenGL libraries of C++.
- Utilized the layout editor to create a UI for the application in order to allow different scenes to interact with each other.

Seamless Presentation Control using Intutive Gestures | OpenCv using Django WebFrameWork

- Utilize computer vision and machine learning techniques to accurately recognize and interpret gestures
- Design intuitive and easily recognizable gestures for common presentation actions (eg swiping to change slides) etc.
- Develop APIs and custom plugins to integrate gestures with popular presentation tools like PowerPoint etc.

Experience: SmartBrains Engineers & Technologist Pvt Ltd (Web Developer)

Worked with technologies like HTML, CSS, JavaScript, React.js, Next.js, MongoDB, Jenkins, VS Code, while building projects and automating different tasks. Also started taking freelance projects where I build and deploy responsive websites for clients.

Certifications

- Ethics in the Age of Generative AI course
- Generative AI The Evolution of Thought full
- IEEE Papers research of 2000 paper on deep learning as Humain Brain.
- International Level student in Data Science using Python
- UI/UX Development under livelihood projects
- Employblity Skills in Wadhani Foundation
